

Setting the Bar Higher...

Match Made in Measurement

Our primary goal at Apex Software is to provide innovative solutions that increase your overall productivity and revenue. In order to accomplish this, we understand it takes more than just excellent software. Our longstanding partnership with Leica Geosystems continues to provide the very best of integrated solutions for Mobile Field Sketching and Laser Measurement.

Apex and Leica pioneered the DISTO™-to-Sketch solution via Bluetooth™ in 2004. Since then, our mobile products have taken full advantage of everything the DISTO line of laser distance meters has to offer and with the new DISTO D8, we've done even better! Individually, both solutions are designed to speed up the process in the field allowing you to accomplish more in less time. Coupled together, Apex Nexus™ and the DISTO D8 are a powerful combination that makes measuring & drawing structures in the field faster and easier than ever before.

Through time and field tested Bluetooth connectivity, you can transmit each of your measurements directly from your DISTO D8 to Apex Nexus and watch as your sketches automatically take shape with the press of a button. How easy is it? Simply pair your DISTO D8 with your Tablet PC and you're ready to go! No more paper drawings, manual calculations or dragging your tape through (insert your favorite messy story here) and around obstacles that only slow you down.

With the intuitive digital pencil & paper drawing style of Apex Nexus and the Bluetooth enhancements of the DISTO D8, you'll never need your tape measure or clipboard again!
